

I urge the FCC to dismiss the requests of the N.A.B. to stop XM Satellite Radio from broadcasting traffic and weather reports. I pay for satellite radio service in order to get the information I want and need when I need it. I pay a monthly fee to be able to hear news and information when I need it, without having to wait until regular broadcast stations decide to stop telling jokes or spouting out worthless junk, and then maybe give a few seconds of intelligent information. I urge the FCC to let satellite radio operate free and clear of the N.A.B. and it's influence. No person or political organization should have the right to limit free speech in a free country. Instead of the N.A.B. trying to improve the sorry state of the radio industry, they cry and complain that someone just might be doing a job better than they. Please let satellite radio continue to provide local traffic and weather reports. Thank you,  
Charles Martin
